## WPO proceeds with the issuance of 4 million GreenTokens

**Paris, 1<sup>st</sup> December 2020 – WPO announces the issuance of 4 million GreenTokens.**

**The GreenToken Public Offering initiated by WPO, which was conducted from 8<sup>th</sup> September to 12<sup>th</sup> November, 2020, is now closed. In conformity with the Information Document, WPO proceeds with the minting and the issuance of 4 million GreenTokens.**

The GreenTokens are the digital assets at the heart of WPO's project to transform the European energy sector and accelerate the energy transition through the use of Blockchain Technology.

With this project, WPO and its partners aim to build an intelligent and seamless European multi-service platform for energy data-management; a form of decentralized energy internet based on Blockchain and Artificial Intelligence.

For more than two years, professionals of the Renewable sector have subscribed to the GreenToken Private Sale in an effort to bring trust and transparency in the energy sector through Blockchain. Contractual commitments and recurring purchase options already represent an amount of 3 million euros over 10 years.

In compliance with the Information Document for the GreenToken Public Offering, WPO will now allocate 643,603 GreenTokens subscribed for the Private Sale before assigning the remaining GreenTokens to the Reserve.

*“The issuance of these 4 million tokens is another milestone for the GreenToken project. Members of the GreenToken Network who subscribed to the private sale will now be able to use the GreenToken as a payment method specific to the Energy Transition. We are proud to see this new phase of the GreenToken project come to fruition. »*

**Barthélémy Rouer, CEO of WPO**

### About WPO

Established in 2008, WPO is a leader in independent asset management and associated specialized services for wind and solar power in Europe. The company oversees 600 production sites in 12 European countries with a capacity of more than 5 gigawatts, i.e. 2000 wind turbines and 12 million photovoltaic modules. Today, WPO contributes to the production of electricity from renewable sources for the equivalent of about two million people, almost the population of intramural Paris. It offers technical, commercial, and financial management solutions, and holds among its clients and stakeholders more than 360 companies, including investment funds, insurers, reinsurers, developers, banks, mixed economy companies and independent electricity producers. In a world where energy management is becoming increasingly decentralized and complex, WPO's main objective is to ensure energy sustainability and create the conditions for greater trust through issuing the first fully-traceable energy production certificates from reliable renewable sources on the world market. WPO is listed on the Financial Times FT-1000 2017 as one of Europe's 1000 Fastest Growing Companies
